Mushroom Classification App
localhost:8502
Deploy
Mushroom Classifier
Steps to classify mushrooms:
1. Upload your dataset.
2. Select the classification algorithm.
3. See the classification result instantly!
About the App
This app is designed for mushroom classification using machine learning models like Random Forest, Logistic Regression, and Decision Trees. Upload your dataset, select features, and run the classification model!
Mushroom Classification App
Welcome to the Mushroom Classification App! Use this app to classify mushrooms as edible or poisonous based on their features.
Upload your mushroom dataset (CSV format)
Drag and drop file here
Limit 200MB per file • CSV

About the App
This app is designed for mushroom classification using machine learning models like Random Forest, Logistic Regression, and Decision Trees. Upload your dataset, select features, and run the classification model!
Classification Result
The selected algorithm **Random Forest** has classified the mushroom as:
n
This mushroom is predicted to be **Poisonous**.
Classification was successful!
